EDUCATION

University of Alberta

Bachelor of Science with Specialization in Computing Science

- Dean's Honor Roll

Edmonton, Alberta

Jan 2023 - May 2027

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Amazon Web Services (AWS)

Issued: Apr 2025

EXPERIENCE

Software Engineer Intern

AltaML

Summer 2026

Toronto, Ontario

- Developing AI agents and GenAI workflows.

Software Engineer Intern

TD Securities

Jan 2026 - Apr 2026

Toronto, Ontario

- Spearheaded migration of analytics pipelines from Apache Druid to Databricks using Delta Lake across 50+ Kafka topics, architecting real-time medallion pipelines with parallel Smoosh segment extraction into Delta tables reducing extraction time by 70% by replacing sequential ZIP file processing with distributed Spark worker nodes.
- Engineered scalable ADLS-integrated Python extraction pipelines using parameterized Databricks Jobs with dynamic argument passing, enabling parallel ingestion across multiple tables and high-volume datasets, ensuring the architecture scales horizontally as new Kafka topics and data sources are onboarded.
- Transitioned streaming workloads from Spark Structured Streaming to Spark Declarative Pipelines, eliminating manual state/partition management and reducing pipeline complexity by 30%, improving reliability in production.
- Delivered 20+ deployments across multi-environment releases via XLR pipelines, executing SQL scripts, Salt commands, and Autosys jobs, while configuring networking rules across Databricks, Kafka, and AKS to enable low-latency data flows.

Software Engineer Intern – ServiceNow

OMERS

May 2025 – Dec 2025

Toronto, Ontario

- Engineered automation for 30+ enterprise workflows, leveraging Business Rules, UI Policies, and JavaScript to reduce manual operations and increase system throughput.
- Strengthened platform security by migrating 1,000+ monthly alerts from Basic Auth to OAuth 2.0, eliminating credential exposure risks and securing REST API integrations.
- Improved request fulfillment time by 30% by engineering 5+ dynamic catalog forms, integrating REST APIs, notifications, and adaptive form logic based on business rules.
- Built and deployed Azure Forms and Microsoft Fabric integrations to streamline data intake, validation, and transformation workflows.

Software Engineer Intern

Credwise Financial Inc.

Aug 2024 – Dec 2024

Edmonton, Alberta

- Resolved 25+ production issues across backend workflows and Angular UI components, improving responsiveness and reliability.
- Built CI/CD pipelines with GitHub Actions and Firebase Hosting while reducing asset retrieval latency by 50% through Firestore Storage migration.

PROJECTS

FinSight Auditor (In Progress) | Python, FastAPI, PostgreSQL, pgvector, LangChain, Next.js, AWS

- Architecting an AI audit platform to process GL exports, payroll, and bank statements to identify anomalies, inconsistencies, and compliance risks.
- Building end-to-end data pipelines for ingestion, Amazon S3 storage, data cleaning, transaction classification, and vector embedding generation, enabling fast semantic search using pgvector.
- Implementing a hybrid anomaly detection engine combining OpenAI API-powered LLM reasoning, rule-based compliance checks, and statistical outlier analysis to generate high-precision risk scores and explanations.

SKILLS

Languages: Python, JavaScript/TypeScript, Java, C/C++, SQL

Frameworks: React, Angular, Next.js, Node.js, Django, Express

Databases & Tools: PostgreSQL, MySQL, MongoDB, Databricks, Kafka, AWS, Azure, Spark, Docker, Kubernetes, Git, Linux

AI/ML: pgvector, RAG, LLM, LangChain, TensorFlow, pandas, NumPy, Matplotlib, Scikit-Learn
